WHO ARE WE?

The Motorsport Group is run by competitors for competitors. We organise a variety of events for beginners and experienced drivers alike. If you enjoy precision driving or the thrill of speed, the Boundless Motorsport Group is for you.

WHAT DO WE DO?

From track days to Autotests and Autosolos, the group runs a broad range of events for all abilities. Most events can be done in your normal road car, but if you choose to excel in a more specialised area, you'll find lots of enthusiastic members who will be more than willing to offer support and advice.

MSA COMPETITION CARD

The Boundless Motorsport Group is Motor Sports Association (MSA) Affiliated. In order to participate in any MSA permitted motorsport event, you need an MSA competition licence card (in addition to your Boundless Membership). This allows you to take part in almost any motorsport event around the country.

MOTORSPORTS GROUP VISITS

Get together with other motoring enthusiasts and enjoy exclusive access and tours of iconic motorsport venues.

TRACK DAYS

These events are usually held on a race circuit and are non-competitive. Track days are designed to give drivers the opportunity to test the full potential of their own vehicle's speed and handling abilities. You can use your own vehicle, be it your everyday family saloon or a track day special. This is a great chance to drive your vehicle at high speed under safe and controlled conditions, away from public roads.

ROAD AND NAVIGATIONAL RALLYING

The Motorsports Group runs a number of different navigational rallies for you to get involved with, from 12 Car Rallies to Tulip Road Rallies. Road Rallying involves a driver and navigator finding their way around a set route from A to B. The emphasis is as much on navigation as driving skill, as crews must maintain a 30mph average time schedule through all the control points. The navigator may use Ordnance Survey maps to direct the driver around the route or possibly follow a Tulip Road Diagram. You must be very careful with timing – it's just as bad if you check in too early as it is to check in too late at a time control.

AUTOTESTS AND AUTOSOLOS

Autotests are usually held on grass. This is one of the slowest forms of motorsport, because you rarely need to get out of first or reverse gears. Autotesting demands a bit of skill, putting the emphasis on precision driving.

Autosolos are faster than Autotests and are usually held on tarmac. They're an ideal starting point for motorsports. You'll also get a chance to do some marshalling between tests, and don't forget, you must drive your own car to the event.
